SUMMARY

Over ten years of experience in the Information Technology industry as a Developer. Results driven, customer focused. Skilled in identifying technical needs and adept in troubleshooting, diagnosing and resolving issues.   Continually advancing my development skills by attending boot camp, user group communities and participating in secondary projects (see Secondary Projects at end of resume).

WORK EXPERIENCE

JPMorgan Chase   **June 2008 – Present**
Application Developer

- Add new functionality and enhancements to existing .Net and Java web apps.
- Part of the CCB Agile Team, we get placed into various technologies for Web development. We work with most UI based technologies, i.e. Angular, Backbone including vanilla JavaScript with CSS and SASS.
- Use Gulp builds for internal JavaScript frameworks and deploy to Node server for dev/test. Create minified js file for prod distribution using internal CDN's for apps. Also use Gulp within a Java-Spring web-app for the UI layer in Mortgage.
- Most apps were built with bootstrap and some custom CSS to speed up the development process. UI changes and functionality were implemented and changed based on the frequent product owner requirements.
- Assisted Framework team with UI icons and widgets by converting and porting icons to SVG fonts to make it resemble the customer facing websites.

Ohio Department of Job and Family Services (ODJFS)   **April 2007 – May 2008**
Oracle Developer

- Responsible for application development and data modeling with Oracle Forms and reports and Oracle database.
- Implemented Federal regulations in existing and new development projects for ODJFS.
- Actively involved in design and implementation of bulk data split and migration project.
- Successfully Implemented an LMS application with a Java UI for new hires and creating a mirror database for training purposes.
- Scripted and scheduled UNIX jobs for data syncing and profiles across environments on different Oracle databases.
- Created Forms and databases triggers/objects as required for increased user performance.
- Assisted in planning for pre-deployment cleanup and purge for an existing Enterprise Release.
- Implemented nightly refresh package for data sync between OLTP to OLAP with ECS job scheduler.

Skills

Ruby
Ruby on Rails

Javascript /
Angular/Backbone

Ionic/cordova
(phonegap)

C# / .Net MVC

Java Spring MVC

CSS / SASS / GIMP /
Photoshop

Node / Gulp

Shell scripting
PostGres
Oracle
SQL Server

Jekyll / roots

IBM AIX
Sun Solaris
HP-UNIX
Windows NT/XP

SQL
PL/SQL
Oracle Forms
Oracle DB Suite

Citigroup IT Operations and Solutions (CITOS)   **October 2005 – January 2007**
Application/Database Information Security Administrator

- Responsible for overseeing the day to day activities on Citibank Corporate and Consumer profiles on various Citibank Applications.
- Oracle database security admin for setting indirect grants for users to increase security.
- Provided Application and database level Profile Management to Citibank Turkey as a Local Security Administrator for all Citibank Turkey Corporate users.
- Oversaw
- Managed the Unix System Administration with BOKs and PPak setups, for administration and cleaner log generations for transferring to the Review Team.
- Performed analysis of Risk Control Self-Assessment (testing, fixing and implementation) for team projects.
- Maintained control over part of the Business Information Security, along with the Information Control Unit.

Stream International   **March 2003 - October 2005**
Microsoft Home Products Tech

- Performed analysis of Microsoft Home products performance on different Windows based machines.
- Maintained refactoring list of common issues and workarounds for Microsoft products to assist all users.
- Acted as point of escalation for Tier II tech issues relating to Microsoft products.
- Used Clarify for managing and distributing load on tickets within the team.
- Consulted customers on maintenance of their Windows based systems with Microsoft products for an optimum performance.

EDUCATION

- Bachelor of Engineering (Electronics and Communication Engineering)
- 2014 Graduate of Dev Bootcamp (http://devbootcamp.com/)

SECONDARY PROJECTS

Github Repository
- https://github.com/theidlemonk

Dev Bootcamp Projects
- https://github.com/cbus-sea-lions-2015/catch-me-api (rails api backend for the mobile app)
- https://github.com/cbus-sea-lions-2015/catch-me-mobile (ionic mobile app)
- https://github.com/cbus-sea-lions-2015/NightFury-Overflow (a stackoverflow clone)

Practice projects
- http://theidlemonk.github.io/funStuff/DeafGrandMaGame/index.html (a bootstrap scratch)
- http://theidlemonk.github.io/funStuff/movie-library/index.html (a materialize css scratch)
